Version Six of our Seminar agenda has been posted as item one in COURSE DOCUMENTS. Please review it carefully.

**Mon, Dec 11, 2006 -- *Request for Dates E-Mail***

Posted by: John Lewis

A "request for dates" e-mail has been sent to all members for response as soon as possible. As well, initial documentation for the workshop has been mounted in COURSE DOCUMENTS.

**Mon, Dec 04, 2006 -- *A Reference Forum***

Posted by: John Lewis

A second Forum has been created in DISCUSSION BOARDS for the purpose of listing references that you feel either our group or the participants (or both) would be of value. Simply add your suggestions as a new thread and each time you add something, as instructors you may "modify" your submission accordingly. Let's aim for a qualitative bibliography including pertinent websites, accessible monographs, and other textual resources.

For the theory session (B) it doesn't make sense to move them to the computer lab since its not hands on. I was considering letting that last session be hands-on, but its only a half hour and perhaps its not a good idea to do anything hands-on within that time. What do you guys think?

**Seminar Agenda Version SIX!**[On-Line Seminar v.6 click to download or open](#) (90.5 kb)

Here is the agenda rephrased as a result of our meeting on Wednesday. Please make sure that I have integrated all of our suggested changes AND that I have it scheduled in the right place!

**Version 4 update**[Seminar Agenda v1\[\[1\].4.doc](#) (86.5 kb)

This is my final revision with Bio info. I'll make sure that we have adequate copies for the meeting since I was so tardy.

Here is an updated version of our agenda; changes include increased descriptive material and some biosketches of the faculty.
