

## Wiki Tool – Making Contributions

To learn about creating a Wiki in Pulse, see the tutorial at:

<http://jeffline.jefferson.edu/Education/edservices/courseinfo/learning-objects/wikis.html>

After you have created a wiki, you can add text, hyperlinks, images, and embedded media.

**Note:** Students will be able to contribute to the wiki when **Yes** has been selected as the **Make the wiki available** option. They can contribute if to the wiki if they have been selected as a member of the wiki.

### Navigation

1. Enter the Pulse course containing the Wiki.
2. Click a content area in the course menu frame to locate the Wiki
3. Click the View link for the Wiki
4. Click the **Edit** link in the wiki sidebar.

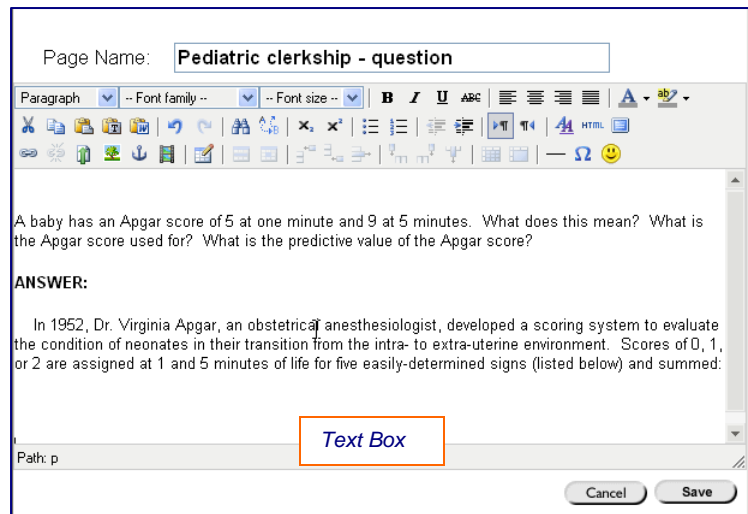

### Adding Text

Enter information into the text box.

If you copied text from a Microsoft Word document, click  and press the **ctrl+v** on your keyboard to paste in the text from the **Paste from Word** window.

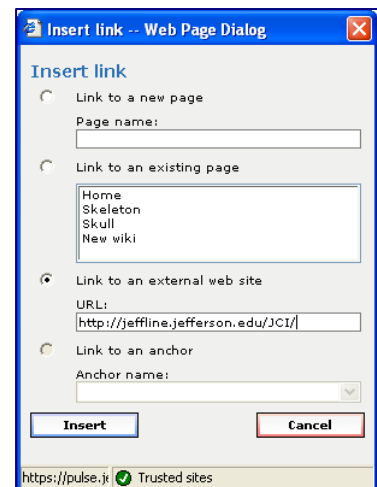

Select the **Insert** button to insert the content into the blog.

If you copied text from another type of document, click  (**ctrl+v**) to paste in the text.

### Inserting Hyperlinks

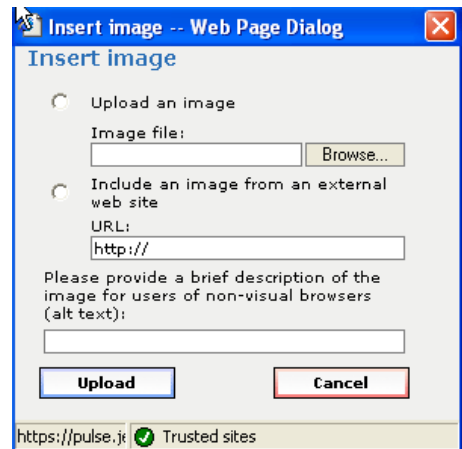

1. Click the **Edit** link in the wiki sidebar.
2. Highlight the text that you want to link to another page.
3. Click .
4. If the link is to a new internal page, select the **Link to a new page** option and enter the page name in the **Page Name** field. This action creates the new page and the link to that page. If the link is to a page that was created previously, select the **Link to an existing page** option and select the page from the list of pages. If the link is to an external web site, select the **Link to an external web site** option and enter the address in the **URL** field.
5. Click the **Insert** button.
6. If done, click the **Save** button.

## Wiki Tool – Making Contributions, page 2
