

Thomas Jefferson University
Department of Neurology
presents the

5th Annual Neurology Update
With a Focus on Epilepsy Conference
November 14, 2009
Bluemle Life Sciences Building * Jefferson Medical College
Philadelphia, PA

The Thomas Jefferson University Department of Neurology cordially invites you to attend the **5th Annual Neurology Update with a Focus on Epilepsy Conference**. The conference has been designed for the practicing neurologists who treat a myriad of neurological diseases in their practice. The course directors, Stephen D. Silberstein, MD & Michael R. Sperling, MD, Thomas Jefferson University Department of Neurology, have developed an agenda that will include in-depth presentations on epilepsy, migraine, multiple sclerosis, and movement disorders.

The goal of the conference is to improve the performance of practicing neurologists as they care for patients with epilepsy, migraine, movement disorders and multiple sclerosis. The conference will address barriers to change and expand the participants' knowledge with resources, tools and techniques. The faculty will provide guidance to assist participants in applying new knowledge to their practices. The design includes pre and post evaluation activities for participants to measure the impact of the activity in practice.

Conference Faculty

Ronald P. Lesser, MD
Johns Hopkins Medical Institutions

Eduardo A. De Sousa, MD
Jefferson Medical College

Tsao-Wei Liang, MD
Jefferson Medical College

Scott Mintzer, MD
Jefferson Medical College

A.M Rostami, MD, PhD

Stephen D. Silberstein, MD
Jefferson Medical College

Michael R. Sperling, MD
Jefferson Medical College

William B. Young, MD
Jefferson Medical College

Course Objectives

At the conclusion of this course, participants should be able to:

- Differentiate the risk/benefits of the newer therapeutic agents in epilepsy care
- Describe the early indications of deep brain stimulation use in epilepsy
- Apply existing diagnostic techniques to better recognize and treat patients who suffer from migraine
- Assess and communicate the benefits and risks of current and emerging therapeutic agents being used in the treatment of multiple sclerosis
- Differentiate between common and uncommon movement disorders
- Formulate an appropriate treatment/management approach to movement disorders
- Consider emerging therapies in the treatment of patients with movement disorders
- Integrate existing prescribing, treatment and classification guidelines into their practices
- Assess their individual practices in light of the information and discussions during the course, and identify specific strategies to implement as part of a continuing improvement process for their practices
